

Button that  
you press  
to dispense  
drink

Screen  
where a  
user can  
select the  
drink that  
they want

Handle that  
is pressed  
to get ice

Caption: This is the Coca Cola drink dispenser in the Ratty. This interface gives the user the ability to select between dozens of different drinks without dozens of spouts like previous drink machines. There is a screen where you select a drink of your choice and a button that, when pressed, dispenses a selected drink. There is also a handle that when pushed dispenses ice.
