

Button that
you press
to dispense
drink

Screen
where a
user can
select the
drink that
they want

Handle that
is pressed
to get ice

Caption: This is the Coca Cola drink dispenser in the Ratty. This interface gives the user the ability to select between dozens of different drinks without dozens of spouts like previous drink machines. There is a screen where you select a drink of your choice and a button that, when pressed, dispenses a selected drink. There is also a handle that when pushed dispenses ice.
